3. ID Photo on File

Placeholder ID photo (synthetic, non-personal) — used to verify that embedded images are preserved and left untouched during text-only redaction.

4. Notes

This paragraph mixes layout elements deliberately: bolded sensitive tokens, an inline icon above, an embedded photo, and a formatted table — so a redaction pipeline can be tested for (a) correct detection of PII strings such as names, emails, phone numbers, and account numbers; (b) preservation of non-text elements (icons/images) unless explicitly targeted; and (c) retention of table structure and cell formatting after text substitution.
